

# ActiveRecord Avanzado - Part 1

**Author:** Marcos Vanetta

**Year:** 2010

**mail:** [marcos.vanetta@aycron.com](mailto:marcos.vanetta@aycron.com)

**Aycron**

# Agenda

- Validations and how to skip them
- conditional search
- Changed?
- Order
- Named\_scope
- Default\_scope
- Include & Join (differences)

# Validations

Validations are used to ensure that only valid data is saved into your database.[1] \* Use[2]

validate\_XXX\_of :field, \*attr\_names

- Attr: message, allow\_nil, allow\_blank, with, on, if unless

**Demo:** 1
